Professional Experience

Berlin, Germany	Full Stack Engineer <i>Oyle</i> "Oyle, the night companion that guides you through the night, discover clubs and see live data with real feedback from other users." Lead the back end in a team of 3 developers. My responsibilities include: <ul style="list-style-type: none">• Building a Web Scraping service in Python using Flask, Selenium, BS4 and Google Maps API's.• Implementing a second general-purpose backend server in Node.js, Express, Prisma and PostgreSQL.• Deploying to Heroku using PM2 for orchestration and creating custom buildpacks.
2022 – 2022 Remote	Full Stack Developer <i>Sindi.cat</i> "Sindi.cat is a community-oriented platform, where users and organizations go first and are not a second-thought. Easily manage and organize your teams with no technical skill required." <ul style="list-style-type: none">• Build the app from the ground up, developing a client in Next.js and server using Fastify.• Using shared business logic between the two so information would stay synchronized.• Designed and implemented the underlying API and data modelling.• Integrated third-party authentication.• Used Amazon S3 for image uploading.• Deployment on Vercel and Heroku.
